🌐 Vijay Sankaranarayanan 🔄 VIJAYSANKARA

OBJECTIVE

Aspiring Software Developer with strong SQL skills, experienced in writing efficient queries, analyzing data, and optimizing database operations. Dedicated to clean, reliable solutions with a focus on troubleshooting, debugging, and supporting continuous improvement in data-driven workflows.

EDUCATION

CSE, Panimalar Engineering College
CGPA : 7.86

Senior Secondary,
Everwin Vidhyashram Sr. Secondary School

Higher Secondary,
Smt. Durgadevi Choudhary Vivekananda Vidhyalaya

INTERSHIPS

InternPe, Python Programming Intern
06/2024 – 07/2024 | Chennai, India
Developed logic-based applications using Python during my internship to enhance programming skills.

InternPe, Web Development Intern
12/2023 – 01/2024 | Chennai, India
Developed and deployed responsive web interfaces to showcase my frontend development skills

CERTIFICATIONS

- Deloitte Data Analytics Job Simulation (Forage)
- Programming in Java (NPTEL)
- Full Stack Web Development Bootcamp(Udemy)

ACHIEVEMENTS

Solved 100 coding problems on platforms like LeetCode and HackerRank

Completed TCS NQT (Cognitive + IT) with an overall score of 75%

Participated in MAGNIFICA Event (Brain Teaser) at Saveetha Engineering College

SKILLS

Programming Languages

Java (OOPS,Collection Framework,Exception Handling)
Python (Pandas,Numpy)

Web Technologies

HTML
CSS (BootStrap,FlexBox,Grid Layout,CSS animations)
JAVASCRIPT (Event Handling,Form Validation)
ReactJS

Database Systems

MYSQL (CRUD operations,Joins,Database Design)

Specialized Area

Full Stack Developement, Data Science,

Version Control

Git, Github

PROJECTS

IFRS using Advanced Clustering Technique,
[Food Recommendation System]

Tools: [HTML,CSS,JAVASCRIPT, BOOTSTRAP, PYTHON, DJANGO, MYSQL]

- Developed a recommendation system for easy user accessibility.
- Implemented Machine Learning for food recommendation, achieving a Food recommendation webpage
- Created Admin Panel, ensuring food changes, ingredients, addition and removal of a food item.
- Used clustering algorithms to analyze food ingredients and generate personalized recommendations.

AI Based Real Time Restricted Area Intrusion Detection and Alert System,

[Intrusion Detection System]

[HTML, CSS, JavaScript, Python, OpenCV, YOLO, Django, MySQL]

- Built a real-time system using OpenCV to detect unauthorized human entry.
- Applied AI models to identify intrusions from live video streams.
- Implemented instant alert notifications on detection.
- Developed a web interface for monitoring and control.
